## **ABOUT CUENCA**

In the eastern part of Castilla-La Mancha region you will find this town with the UNESCO World Heritage designation for its wealth of monuments. The Cathedral, las “Casas Colgadas” (the Hanging Houses), its many art galleries, its Abstract Art Museum (the centerpiece of the city’s thriving art scene) and medieval cobbled streets charm the most hardened traveller. The town spreads out from atop a promontory winding between the stunningly dramatic gorges carved by two rivers, the Huécar and the Júcar. Meanwhile, below, the modern town grows on the Júcar plain.
