

Seminar for New Academic Researchers 2017

Dear Colleagues,

REGIOlab is pleased to announce the first **Seminar for New Academic Researchers (SNAR)** at the *University of Oviedo*, on September 11, 2017. This meeting is intended to advise recent PhD graduates in developing their lines of research and cementing their long-term careers.

Therefore, the objective of this seminar is **NOT** to present a specific paper but to show recent ongoing or future works as a whole. The participants will benefit from the knowledge and experience of **Professor Geoffrey J.D. Hewings** (*REAL - University of Illinois*) and the other senior researchers that will attend this event through their valuable comments, suggestions and advices.

The main issues to discuss would be those related to urban economics, regional science, spatial analysis and input-output models, but any other topic is more than welcome.

Please confirm your willingness to participate by sending an email to andre.carrascal@usc.es including your name, affiliation and main topic before the 25th August 2017.

We are looking forward to seeing you in Oviedo.
